Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.

According to the documentary short Evolution vs. God, Darwinism is a leap of faith that falls far short of Creationism in explaining the mysteries of our existence. The film, which could have presented a fascinating open debate on a crucial subject, quickly devolves into a shallow-minded "gotcha" exercise.. Throughout the course of the film, we're given flashes of rapidly edited interview ...
