Math 3210: Foundations of Analysis I - Spring 2014. Instructor: Richard Wade Email: wade at math dot utah dot edu Course Description: Math 3210 has two aims. The first is to make some concepts from calculus mathematically rigorous: we'll see how the real numbers can be defined axiomatically, and get to grips with how differentiation and integration really work.

However, you should write up your own solutions to the problems in your own words. Most, but not all, of the problems will be taken from the textbook. Most of the problems will ask you to write a proof, and all problems will require you to show your work to get any credit.

Subsequent sections outline the construction, beginning with the natural numbers, of the integers, the rational numbers, and finally the real numbers. This is only an outline of the construction of the reals beginning with Peano's axioms and not a fully detailed development.

Take any two books on undergraduate real analysis and compare their tables of contents, and chances are you'll find very substantial overlap. Both will probably begin with a chapter on the basic properties of real numbers, followed by a discussion of sequences and series in which the notion of limit is first introduced.

The central topic is how to get (automated) theorem proving systems (TP) and computer algebra systems (CAS) to (at least) talk to each other. Much to the surprise of most mathematicians, proving systems and computation systems have developed completely independently of each other over the last 30 years.

Mathematical analysis as a unified and systematic whole was put together in the works of I. Newton, G. Leibniz, L. Euler, J.L. Lagrange, and other scholars in the 17th century and 18th century, and its foundations, the theory of limits, was laid by A.L. Cauchy at the beginning of the 19th century.

The proof goes Let x be in M (and $x \neq 1$) let u denote x . Then $x' = u'$ Which is to say if x is in M and $x \neq 1$ x is the successor of a number, then so is x' so for all numbers x , $x = 1$ or x is the successor of a number.
