Common Laboratory Equipment: Types & Uses - Study.com

Attempts at standardized temperature measurement prior to the 17th century were crude at best.

For instance in 170 AD, physician Claudius Galenus mixed equal portions of ice and boiling water to create a "neutral" temperature standard. The modern scientific field has its origins in the works by Florentine scientists in the 1600s including Galileo constructing devices able to measure relative ...

Temperature measurement - Wikipedia

Abstract Astronomers can figure out what distant stars are made of (in other words, their atomic composition) by measuring what type of light is emitted by the star. In this science project, you can do something similar by observing the color of flames when various chemicals are burned.
