In finance, a haircut is the difference between the market value of an asset used as loan collateral and the value ascribed to that asset when used as collateral for that loan (i.e. an ascribed (nominal) reduction to the value of that asset, when it is used as collateral). The amount of the haircut reflects the perceived risk of the asset falling in value or being sold in a fire sale; the ...

Financial economics is the branch of economics characterized by a "concentration on monetary activities", in which "money of one type or another is likely to appear on both sides of a trade". Its concern is thus the interrelation of financial variables, such as prices, interest rates and shares, as opposed to those concerning the real economy. It has two main areas of focus: asset pricing and ...
