We will now see how an exponential function appears graphically. As with any function whatsoever, an exponential function may be correspondingly represented on a graph. We will begin with two functions as examples - one where the base is greater than 1 and the other where the base is smaller than 1. In this function the base is 2.

For $b = 1$ the real exponential function is a constant and the derivative is zero because $e^x = e$, for positive a and $b > 1$ the real exponential functions are monotonically increasing (as depicted for $b = e$ and $b = 2$), because the derivative is greater than zero for all arguments, and for $b < 1$ they are monotonically decreasing (as depicted for $b = 1/2$), because the derivative is less than zero ...

Exponential relationships are relationships where one of the variables is an exponent. So instead of it being '2 multiplied by x', an exponential relationship might have '2 raised to the power x': Usually the first thing people do to get a grasp on what exponential relationships are like is draw a graph.
