Infinite Pre-Algebra - Exponent Rules

Since you move the decimal point five places, the exponent will be -5. Therefore, the correct answer is 7.8×10^{-5} . 2. C. To multiply the exponential terms, use the product rule, $x^a \cdot x^b = x^{a+b}$. Since the bases of the factors are the same, multiply them by adding the exponents. 3. E. This expression can be simplified by using exponent rules.

Exponents Practice Questions - Study Guide Zone

In other words, when there is a negative exponent, we need to create a fraction and put the exponential expression in the denominator and make the exponent positive. For example, But working with negative exponents is just rule of exponents that we need to be able to use when working with exponential expressions. Rules of Exponents:
