Functionalization and dispersion of graphene sheets are of crucial importance for their end applications. Chemical functionalization of graphene enables this material to be processed by solvent-assisted techniques, such as layer-by-layer assembly, spin-coating, and filtration.

Chemical functionalization of graphene and its ...

Principal component analysis (PCA) is a statistical procedure that uses an orthogonal transformation to convert a set of observations of possibly correlated variables (entities each of which takes on various numerical values) into a set of values of linearly uncorrelated variables called principal components. If there are observations with variables, then the number of distinct principal ...

Principal component analysis - Wikipedia

Introduction. Learning from conspecifics is prevalent among social animals (Gariépy et al., 2014). For example, after only a single trial of olfactory social learning, rodents form long-term memories of their mates, territories, and safe foods, all of which are essential for survival (Galef, 1982, Brennan et al., 1990, Lesbarguères et al., 2011).

IGF1-Dependent Synaptic Plasticity of Mitral Cells in ...

James "Jim" Wells focuses on understanding and modulating signaling processes in human cells through protein and small molecule design. His lab seeks activators as well as inhibitors of signaling molecules, including proteases and kinases, and uses them to study the consequences of triggering specific nodes of signaling circuits.

The most common sites where surgical pathologists encounter granulomas are the skin and subcutaneous tissues, lymph nodes, and lungs.1 Most pathologists respond appropriately to this finding by ordering "special stains" to exclude an infection. However, the process of detecting and identifying an organism frequently proves quite challenging.

Granulomatous Lung Disease: An Approach to the ...

"Lab-to-Lab" is an international science-based program established at Saitama University, Japan, that aims to nurture future scientists with new ideas through various international research activities by scientists and students in Japan and the world.
