What Is Nuclear Energy? Energy is the ability to do work, where work is the movement of something when an effort is applied. We need and we use energy in our lives every day. We use energy to ...

What is Nuclear Energy? - Definition & Examples - Video ...

The cetacean skeleton is largely made up of cortical bone, which stabilizes the animal in the water. For this reason, the usual terrestrial compact bones, which are finely woven cancellous bone, are replaced with lighter and more elastic material. In many places, bone elements are replaced by cartilage and even fat, thereby improving their hydrostatic qualities.

Cetacea - Wikipedia

Bohr's second hypothesis in his model was that an electron only loses or releases energy (and therefore a photon) when it goes through de-excitation or drops from a higher energy state to a lower energy state. In order to determine the energy lost by the electron, an expression for an electron's total energy has to be developed.

English Vocabulary Word List - Alan Beale's Core ...

A neutrino (/ n u : ' t r i : n ɒ / or / n j u : ' t r i : n ɒ /) (denoted by the Greek letter ν) is a fermion (an elementary particle with half-integer spin) that interacts only via the weak subatomic force and gravity. The neutrino is so named because it is electrically neutral and because its rest mass is so small that it was long thought to be zero. The mass of the neutrino is much ...
