Present the required fundamentals of computer science while preparing students for further study with the unique, appealing approach in Lambert's FUNDAMENTALS OF PYTHON: FIRST PROGRAMS. Students start with simple algorithmic code before they scale into functions, objects, and classes as problems become more complex and require new abstraction mechanisms.

Fundamentals of Python: First Programs, 2nd Edition ...

Python has simple, conventional syntax. Python statements are very close to those of pseudocode algorithms, and Python expressions use the conventional notation found in algebra. Thus, students can spend less time learning the syntax of a programming language and more time learning to solve interesting problems.! Python has safe semantics.

Fundamentals of on. Python - Washington and Lee University

Cengage Learning is a leading provider of customized learning solutions with office locations around the globe, including Singapore, the United Kingdom, Australia, Mexico, Brazil, and Japan.

Fundamentals of Python - Washington and Lee University

Python lets you use either double or single quotes to delimit strings and this is one instance where using single quotes will come in handy. One other thing to be aware of: Sometimes exception handling code (i.e. try except statements) get in the way of debugging your code.
