"Field of Dreams" state - AnswersKey - Word Cookies Answers

The field of view is the same but your angle of view is greater thus you can see more because you "widened" your angle of view. As you can't get anything for nothing the trade off is the more you can see the more distorted it is.circle become ovals strait lines appear curved ect.

Angle of View Vs. Field of View. Is There Even a Difference?!

larger field of view, but not as much detail. 19. Small disk found under the stage that regulates the amount of light that reaches the specimen 20. Large knob on the side of a microscope that should be used first when viewing a slide 22. Small glass or plastic piece that is used to cover a water drop on a slide. 23.

Microscope Mania Unit Review Answer Key - sciencespot.net

The Field of View and Estimating the Size of Specimens When you view an object under the microscope you will observe that it lies inside a circular field of view. Each different magnification has a different sized field of view. If you determine the diameter of the field of view you can estimate the size of an object seen in that field.
