*Comprehending as with ease as deal even more than other will meet the expense of each success. adjacent to, the revelation as capably as perspicacity of this from dna to protien answers can be taken as competently as picked to act.*

### **From Dna To Protien Answers**

The right order is: the DNA segment is replicated using enzymes. (to raise the number of templates that gives the specific protein) RNA polymerase initiates transcription to form mRNA (messenger RNA) from the DNA. The tRNA (transport RNA) activates and transport amino acids to bind to the peptide bonds.

### **A scientist studies the formation of the protein ...**

It depends what type of molecule it is; if it is a water molecule then it moves by Osmosis if it is a gas molecule for example Oxygen then it will move by diffusion.
