Using an Excel worksheet Using Equations Use this guide to help create equations in Microsoft Excel. Learn about averages, functions, and writing your own equations.

**Using an Excel worksheet - Writing Equations**

XtraMath ® helps students transition from counting or calculating the basic math facts to recalling them. Quickly recalling math facts, instead of calculating them, frees up mental resources for higher-level operations. XtraMath's timed activities encourage students to answer questions as quickly as possible.

Yes, you can change this behaviour, but you will probably not want the side effects this causes. The key to limiting the cell contents to the cell's boundaries regardless of whether the adjacent cell contains data is the text alignment Fill. Select the cells you don't want to overflow and right click them > Format cells... > Alignment tab > Horizontal alignment > Fill

**Excel - Prevent cell text from overflowing into next ...**

The N() function allows you add comments directly inside your cells on your formulas. To use the function to add a comment, simply add a plus sign (+) to the end of your formula, and then enter some text in quotes inside the parentheses, passing that text to the N() function.
