A diagnostic test is a procedure performed to confirm or determine the presence of disease in an individual suspected of having a disease, usually following the report of symptoms, or based on other medical test results. This includes posthumous diagnosis. Examples of such tests are: Using nuclear medicine to examine a patient suspected of having a lymphoma.

Narcissistic Personality Disorder. While grandiosity is the diagnostic hallmark of pathological narcissism, there is research evidence that pathological narcissism occurs in two forms, (a) a grandiose state of mind in young adults that can be corrected by life experiences, and (b) the stable disorder described in DSM-IV, which is defined less by grandiosity than by severely disturbed ...
