A frog is any member of a diverse and largely carnivorous group of short-bodied, tailless amphibians composing the order Anura (literally without tail in Ancient Greek). The oldest fossil "proto-frog" appeared in the early Triassic of Madagascar, but molecular clock dating suggests their origins may extend further back to the Permian, 265 million years ago.. Frogs are widely distributed ...

Frog - Wikipedia

Humans and frogs have very similar digestive structures, though the acids present for digestion reflect the diets involved. The most notable difference is found in the excretory system, directly ...
