Electrical Code Issues And Answers

Circuit breakers are designed to trip when a circuit is overloaded. By shutting off the electrical supply, the breaker prevents wires from overheating and potentially starting a fire. Breakers can also trip when they become old.

What Are the Signs of Home Electrical Problems? | Angie's List

1. Overlamping. What it means: A light fixture has a bulb with a higher wattage than the fixture is designed for. Code violation? Yes. Danger level: High. The bulb's intense heat can scorch or melt the socket and insulation on the fixture's wires, which increases the risk of arcing — sparks that jump through the air from one wire to another — a chief cause of electrical fires.
