test environmental science ap human population ... - Quizlet

AP Environmental Science Human Population. There are three stages: (1) in an undeveloped country, birth and death rates are high and the growth rate is low; (2) the death rate decreases, but the birth rate remains high and the growth rate is high; (3) the birth rate drops toward the death rate and the growth rate therefore also decreases.

AP Environmental Science Human Population - Quizlet

The correct answer is (E). Within a population, there are individuals of varying ages. When population ecologists describe the number of individuals fitting into a particular age category, they are looking at population age structure. This data helps ecologists understand how quickly a population can grow.

Unit 5: Population - AP Environmental Science

The Human Population and Demographics. This is a good point in an environmental science class to transition from a focus on the natural world to a focus on the human impacts. The human species is growing at an exponential rate. Not only are our numbers increasing, but the rate of growth is also increasing. Although this seems like a simple concept, the actual rate of increase varies greatly from country to country.
