How to make rosin. Unlike the methods of extraction which rely on the use of highly combustible and overtly dangerous solvents (butane, as in BHO or butane hash oil, or propane), professional rosin creation doesn't involve anything other than a machine press which heats up the hash to a very moderate temperature.

What is Rosin? Exploring The Purest Cannabis Concentrate

16.3.2. Emulate the User. WebDriver is designed to accurately simulate the way that a user will interact with a web application. A common approach for simulating user input is to make use of Javascript to synthesize and fire the series of events that an app would see if a real user were to perform the same interaction.
