Vision Statement. The Virtual Genetics Lab (VGLII) is a simulation of transmission genetics that approximates, as closely as possible, the hypothesis-testing environment of genetics research.

VIRTUAL GENETICS LAB

Advances in genetics and molecular biology have improved our knowledge of the inner workings of cells, the basic building blocks of the body. Here we review how cells can change during a person's life to become cancer, how certain types of changes can build on inherited gene changes to speed up the development of cancer, and how this information can help us better prevent and treat cancer.
