Astrobiology, formerly known as exobiology, is an interdisciplinary scientific field concerned with the origins, early evolution, distribution, and future of life in the universe. Astrobiology considers the question of whether extraterrestrial life exists, and if it does, how humans can detect it.. Astrobiology makes use of molecular biology, biophysics, biochemistry, chemistry, astronomy ...

Astrobiology - Wikipedia

The history of biology traces the study of the living world from ancient to modern times. Although the concept of biology as a single coherent field arose in the 19th century, the biological sciences emerged from traditions of medicine and natural history reaching back to ayurveda, ancient Egyptian medicine and the works of Aristotle and Galen in the ancient Greco-Roman world.

History of biology - Wikipedia

calico cat (British: tortoiseshell-and-white cat) /KAL-ə-koe/ A tortoiseshell cat with white spots. These cats, which are almost exclusively female, have a patchy coloration due to random inactivation of different X chromosomes in different somatic cell lines very early in development (the primary coat color locus in cats is on the X chromosome). ...
