DW-2014 — Driving For Life Pretest Answer

Overview Explore genetic variation through the world of taste in this problem-solving lesson plan. Working both individually and collaboratively, students figure out what kind of tasters they are, what this means about their own genetics, and how genetic mutations can lead to functional differences.

How Gene Mutations Change Your Ability to Taste | Lesson Plan

Overview: Students learn how artificial selection can be used to develop new dog breeds with characteristics that make the dogs capable of performing a desirable task. Students begin by examining canine features and their functions. They are then given a scenario that describes the type of task they need a new breed of dog to perform.

Artificially Selecting Dogs - UCMF

Unit 1: Genetics and Evolution Students will investigate the importance of DNA and genes in controlling characteristics of organisms. They will extract DNA and explore the ethics of genetic manipulation.
