The relationship between race and genetics is relevant to the controversy concerning race classification. In everyday life, many societies classify populations into groups based on phenotypical traits and impressions of probable geographic ancestry and cultural identity—these are the groups usually called "races" in countries like the United States, Brazil, and South Africa.

There are many alleged reasons for the sudden halt to the Moon missions. While officially, a drastic cut in budget was offered to the public for the sudden pulling of further missions of perhaps the greatest achievement in American history, many believed there were other reasons. Some would claim the missions were still happening, only in secret.
