Enhancing Informed Consent The Answer

Technology Makes Best Use of Diminished Time. Informed consent is the communication process between a patient and physician that ultimately results in the patient's agreement to undergo a treatment or procedure. [1] In spite of the significant legal and ethical implications associated with this critical decision-making process, the means for reaching these far-reaching discussions is often ...

Following a brief discussion of the importance of mediator neutrality, this article argues that question-asking is key to facilitating mediation. Four basic question types are described and some applications are offered. In addition to enhancing mediator neutrality, question-asking serves to empower the parties to reach their own resolution to the conflict.

Enhancing Mediator Neutrality Through Question-Asking
