Purpose. To familiarize students with repeating patterns in nature, namely the phases of the Moon. Context. The activities in this lesson involve both individual and class work to facilitate students' learning about the predictability of the moon's phases.

Lunar Cycle - Science NetLinks

Because I kind of have my own correspondences for the phases of the moon, I thought I'd explain them here! New Moon - the moon is just beginning to become illuminated, so it can correspond with new beginnings, a fresh start, cleansing, exploring new opportunities, newfound health or relationships, finding peace with yourself and moving on - "out with the old and in with the new."

The relationship between sleep and memory has been postulated and studied since at least the early 19th century. Memory, the cognitive process whereby experiences, learning and recognition are recalled, is a product of brain plasticity, the structural changes within synapses that create associations between stimuli. Stimuli are encoded within milliseconds; however, the long-term maintenance of ...

Anything that has mass is made up of matter – an all-encompassing word for atoms and molecules that make up our physical world. We describe this matter as existing in states (sometimes referred to as phases). Most people are familiar with three states of matter – solids, liquids and gases – but there are two more that are less commonly known but just as important – plasmas and Bose ...
