Math Puzzles: Try to answer these brain teasers and math ...

I had trouble with a few of the questions from this crossword puzzle. The underscores represent where the blank space is to put the answer. The $_$ of a vector is the distance from the initial point to the terminal point. The $_$ of a triangle is the perpendicular segment from a vertex of a triangle to the opposite side or to the line that contains the opposite side.

Geometry crossword puzzles? | Yahoo Answers

Five Views. The five images below represent five views (from five of its six sides) of a solid object. This object has been assembled by gluing together several identical small cubes so that at least one face of each small cube is totally adherent to a face of another contiguous small cube.
