L5 Elodea-Onion-Cheek-Cell_Size Page 6 of 7 Onion: Draw 2-3 adjacent cells under low power and label the nucleus, cell wall and cell membrane. Draw one onion cell under high power and label the nucleus, cell wall, cell membrane and nucleolus.

STUDENT LABORATORY PACKET - Middle School Science

Comparing Plant and Animal Cells Problem: How are plant and animal cells alike? How are they different? Procedure: In this virtual lab, you will view cells from your cheek (animal cells) and cells from onion, and from elodea, which is a water plant. Careful observation should reveal similarities and differences between the cells.

Virtual Plant / Animal Cell Lab - Mrs. Thomas' classes

The onion skin cell, an example of a plant cell, generally has a rigid, rectangular shape. The onion skin cells were positioned beside each other (length touching length, width touching width) and formed a checkered pattern. Also, like the cheek cell, the onion skin cells were pushed together so that no spaces were in between.

Plant & Animal Cells Staining Lab Answers - SchoolWorkHelper

Magnified view (400x) of squamous epithelial cells from the buccal mucosa (cheek cells from inside the mouth). The cells are stained with a dye called methylene blue. The nucleus and cell membrane are clearly visible. Plant structures such as a cell wall, chloroplasts and large central vacuole are absent.
