There are many ways in which Trichoderma works with the plant including antibiosis, competitive exclusion, facilitation of nutrient absorption and uptake, and induction of plant gene expression. There is a great deal of genetic variation between strains which means that different strains may interact with plants by using some, all or even none of the above strategies.

My guy; What if Ibuki just gets super fucking obsessed with touching Twogami? Like, if he's walking with her she'll link their arms or hold his hand and if he's slouching to talk to her she'll start playing with the top of his glasses or she'll randomly hug him or just start tracing weird triangles onto his arm.
