Xenoestrogens are a type of xenohormone that imitates estrogen. They can be either synthetic or natural chemical compounds. Synthetic xenoestrogens include some widely used industrial compounds, such as PCBs, BPA, and phthalates, which have estrogenic effects on a living organism even though they differ chemically from the estrogenic substances produced internally by the endocrine system of any ...

Xenoestrogen - Wikipedia

Endocrine therapy, also known as hormonal therapy, is treatment used for many early stage breast cancers that are estrogen and/or progesterone positive. When given before surgery to shrink a tumor, it's called neoadjuvant hormonal therapy. When given after surgery, it's called adjuvant hormonal therapy.

Thanks for the compliment, Pamela! I think that the only concern I've ever heard of with regards to the sweeteners was about saccharin. In the book Healthy Teeth for Kids, it talks about how saccharin is bad, but the FDA has approved saccharin for human consumption after banning it in the past.. In any case, I don't think there's a problem since you end up spitting it out anyways.
