**Enterprise Solutions Definition**

Enterprise Software describes a collection of computer programs with common business applications, tools for modeling how the entire organization works, and development tools for building applications unique to the organization. The software is intended to solve an enterprise-wide problem, rather than a departmental problem.

**Enterprise software - Wikipedia**

Enterprise solutions are designed to integrate multiple facets of a company's business through the interchange of information from various business process areas and related databases. These solutions enable companies to retrieve and disseminate mission-critical data throughout the organization, providing managers with real-time operating information.

**Enterprise Solutions - Gartner IT Glossary**

Enterprise software is an over-arching term for any software used in large organizations (whether business or government). It is considered to be an essential part of a computer-based information system, and it provides business-oriented tools such as online payment processing and automated billing systems.

**What is Enterprise Software? - Definition from Techopedia**

a designated zone in a depressed area, esp. an inner urban area, where firms are given tax concessions and various planning restrictions are lifted, in order to attract new industry and business to the area: first introduced in Britain in 1981.

**Enterprise Solutions definition | English definition ...**

Definition of Enterprise Systems Basics. Enterprise system software solutions evolved in the late 1990s and into... CRM. Customer relationship management (CRM) is one of the most popular examples of an enterprise system. ERP. Enterprise resource planning (ERP) is often a component of CRM,...

**Definition of Enterprise Systems | Techwalla.com**

Enterprise level solutions have a number of attributes that your typical software package does not have. They use data from one or more other systems, often getting that data through real time messaging (services) but also frequently through ETL feeds or reading from the database of another system.
