There are many alleged reasons for the sudden halt to the Moon missions. While officially, a drastic cut in budget was offered to the public for the sudden pulling of further missions of perhaps the greatest achievement in American history, many believed there were other reasons. Some would claim the missions were still happening, only in secret.

Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.

The evolution of the peppered moth is an evolutionary instance of directional colour change in the moth population as a consequence of air pollution during the Industrial Revolution. The frequency of dark-coloured moths increased at that time, an example of industrial melanism. Later, when pollution was reduced, the light-coloured form again predominated.
