Prevent certain top-level windows from getting activated in WPF:. I tried the Win32 solution given here but it didn't work for me. While it does seem to prevent window "activation," the Focus is left in limbo afterwards, not restored to another eligible window in your application. Instead, the following worked for me:

Focus groups are a way to discover demographic-relevant information through an interactive group sessions that is run by a facilitator. Instead of a traditional survey which offers specific question and answer options, the focus group allows participants to speak freely about the ideas presented and offer their opinions in a way that supports what the survey is attempting to discover.
