Chapter 6: Activities for Teaching About Evolution and the ...

Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.

Evolution - Wikipedia

The alleged evidence for evolution in action This section will deal with some of the examples used by Teaching about Evolution, and show that they fit the creationist model better. Antibiotic and pesticide resistance Teaching about Evolution claims on pages 16-17:. The continual evolution of human pathogens has come to pose one of the most serious health problems facing human societies.

Biology 1 & 1A

he story of Haeckel's embryos is different in an important way from that of the other chapters in Jonathan Wells' book. As the other authors show, Wells has distorted ideas that are fundamentally true in order to make his point: all his rhetoric to the contrary, Archaeopteryx is a transitional fossil, peppered moths and Darwin's finches do tell us significant things about evolution, four-winged ...
