SCIENCE EXPERIMENTS ON ENVIRONMENTAL EDUCATION AND BIOLOGY. Giorgio Carboni, March 2001 Translation edited by Michael Easterbrook

Science Experiments on Environmental Education and Biology

Plastic film waste can cause a variety of environmental impacts and pose a significant challenge for the consumer product industry. Understanding the environmental tradeoffs of various end-of-life strategies for plastic film waste is thus important for developing and deploying appropriate sustainable solutions.

Life cycle assessment of end-of-life treatments for ...

Greenhouse gases from human activities are the most significant driver of observed climate change since the mid-20th century. 1 The indicators in this chapter characterize emissions of the major greenhouse gases resulting from human activities, the concentrations of these gases in the atmosphere, and how emissions and concentrations have changed over time.

Compost is organic material that can be added to soil to help plants grow. Food scraps and yard waste together currently make up about 30 percent of what we throw away, and should be composted instead. Making compost keeps these materials out of landfills where they take up space and release methane ...

Producing electricity at estuaries using light and osmosis. Published: 23.05.19 — Researchers at EPFL are working on a technology to exploit osmotic energy – a source of power that's naturally available at estuaries, where fresh water comes into contact with seawater. In a laboratory experiment, the team reproduced the real-world conditions that occur where rivers meet the sea (pH and ...
