1.1. Answer File Sysprep works with Unattended Answer Files, without an answer file it can only those two simple tasks mentioned in Introduction above. When you sysprep you tell the system that the settings you will change and tasks you want Sysprep to do are listed in an answer file.

### **System Preparation Tool - Use to Customize Windows ...**

I was under the impression that joining a Windows PC to a domain took care of creating a unique SID. When we started up our company, I cloned roughly 40 PCs with the same non-sysprep OEM image, changed the Product key to one of the other 39 OEM disks I had purchased, and then joined them to the domain.

### **Change PC SID without using sysprep - Windows 7 Forum ...**

How to customize a default user profile in Windows 7, Windows Vista, Windows Server 2008, and Windows Server 2008 R2 The only supported method for customizing the default user profile is by using the Microsoft-Windows-Shell-Setup\CopyProfile parameter in the Unattend.xml answer file. The Unattend.xml answer file is passed to the System Preparation Tool (Sysprep.exe).

### **Customize the default local user profile when preparing an ...**

When you delete the bloatware make sure to un-provision the app too. When I build my image I create a base user first. Then open Administrator account log in as administrator delete other user via control panel never connecting to the internet until this is completed.

### **Sysprep error - Tried Almost Everything - Windows 10**

Microsoft-based operating systems have long used security identifiers (SIDs) that are uniquely generated and assigned to each computer as part of the initial setup of Windows. Each time you ...
