Force and Motion - Crossword Puzzle

Forces are at work all around us and act in pairs against one another. Forces make things move and make them stop. Some forces are very strong, and some are so weak you can't feel them at all. Friction is the force that causes moving things to slow down. Gravity is the force that makes things fall to the ground instead of falling up or sideways.

Forces and Motion Worksheets | edHelper.com

Newton's laws of motion are three physical laws that, together, laid the foundation for classical mechanics. They describe the relationship between a body and the forces acting upon it, and its motion in response to those forces.
