Fundamentals Of Information Theory Coding

Information entropy is the average rate at which information is produced by a stochastic source of data.. The measure of information entropy associated with each possible data value is the negative logarithm of the probability mass function for the value: $= -\sum$. When the data source produces a low-probability value (i.e., when a low-probability event occurs), the event carries more ...

A theory is a contemplative and rational type of abstract or generalizing thinking, or the results of such thinking. Depending on the context, the results might, for example, include generalized explanations of how nature works. The word has its roots in ancient Greek, but in modern use it has taken on several related meanings.. Theories guide the enterprise of finding facts rather than of ...
