Many promising claims about performance improvements were made for TM1 10.2, most of which are related to the new multi-threading feature that allows to utilise as many threads as the server has. The pre TM1 10.2 situation was pretty uninspiring as TM1 server could use only one thread per request, which seems quite out-dated in the era when even mobile phones have 4 cores!

Update (Apr 2010): It’s been quite a few years since I originally did this comparison. Since then, Charles Nicholson and I created Unit Test++, a C/C++ unit-testing framework that addresses most of my requirements and wish-list items. It’s designed to be a light-weight, high-performance testing framework, particularly aimed at games and odd platforms with limited functionality.

The Turing test, developed by Alan Turing in 1950, is a test of a machine's ability to exhibit intelligent behaviour equivalent to, or indistinguishable from, that of a human. Turing proposed that a human evaluator would judge natural language conversations between a human and a machine designed to generate human-like responses. The evaluator would be aware that one of the two partners in ...
