Climate engineering or climate intervention, commonly referred to as geoengineering, is the deliberate and large-scale intervention in the Earth's climate system, usually with the aim of mitigating the adverse effects of global warming. Climate engineering is an umbrella term for measures that mainly fall into two categories: greenhouse gas removal and solar radiation management.

Crystals and Gemstones. Crystals-- In science, a crystal. is a solid substance in which the atoms, molecules, or ions are arranged in an orderly repeating pattern extending in all three spatial dimensions.. The word crystal is a loan from the ancient Greek word (krustallos), which had the same meaning, but according to the ancient understanding of crystal.
