Perception (from the Latin perceptio) is the organization, identification, and interpretation of sensory information in order to represent and understand the presented information, or the environment.. All perception involves signals that go through the nervous system, which in turn result from physical or chemical stimulation of the sensory system. For example, vision involves light striking ...

Perception - Wikipedia

Synesthesia is a perceptual phenomenon in which stimulation of one sensory or cognitive pathway leads to automatic, involuntary experiences in a second sensory or cognitive pathway. People who report a lifelong history of such experiences are known as synesthetes.. The term is from the Ancient Greek σύν syn, "together", and αἴσθησις aisthēsis, "sensation".

Synesthesia - Wikipedia

We have been created fearfully and wonderfully by our Creator God, and the human body showcases God's intricate design. Design features are evident in the structures and functions of each of the body systems. I present a design approach to the study of human anatomy and physiology from a biblical worldview.

The foreskin in sex. Structure of the foreskin. It has been known since antiquity that the foreskin gives pleasure, and only forgotten in the US in the last century or so.. Central to Intactivist claims about foreskin function in sex is the work of Taylor et al., demonstrating that the foreskin itself is richly innervated with Meissner corpuscles, which are sensitive to light touch.
