Resources and Energy - National Park Service

Recall that chemical energy is energy that is stored in foods and fuels. During photosynthesis, plants change the Sun's radiant energy into chemical energy that they store in chemical compounds. Some of these compounds become food for other organisms. Your body transforms chemical energy from food into kinetic energy that you use for movement.

CHAPTER 5 Energy and Energy Resources - Weebly

It's politically correct to recycle but is actually worse than producing new. The only thing worth recycling, according to National Geographic, is aluminum. Everything else uses more energy to recycle than to make a new product. Consider energy used in pick-up (including exhaust fumes), and all the machinery used to recycle. Why do you recycle?

Did you know that recycling uses more energy and resources ...
