A revision guide to ecological validity and the different Sampling Methods, such as opportunity, random, systematic and stratified, for GCSE psychology.

Ecological Validity & Sampling Methods - Getting-in

The glossary that follows assumes a definition of ecology--the study of interactions between organisms and their environment--much wider than what fits under the field's habitual statistical persona. Ecofeminism and ecopsychology are mentioned, for example, as are terms from organic gardening and permaculture.

The Glossary. Abundance: any measure of the amount of an organism. Can include density, biomass, frequency, cover, presence/absence, etc. See species abundances in ordination.. Arch effect - a distortion or artifact in an ordination diagram, in which the second axis is an arched function of the first axis. It is caused by the unimodal distribution of species along gradients.

Glossary for ordination terms

Exchange surfaces. Many organ systems are specialised so that they can maximise the amount of materials exchanged over their membranes. There are a number of ways in which the effectiveness

of an exchange surface can be increased.

Exchange surfaces in Cells - Getting-in

We recently proposed the adaptive monitoring approach for improving ecological monitoring, but to date no explicit examples exist. In this review, we demonstrate adaptive monitoring using two new case studies where pre-existing monitoring programs were redesigned to address new policy and scientific questions without breaching the integrity of past and ongoing time-series data.

Adaptive monitoring in the real world: proof of concept ...
