Students practice the initial steps involved in an engineering design challenge. They review the steps of the engineering design loop, discuss the client need for the project, identify a relevant context, define the problem within their design teams, and examine the project's requirements and constraints.

Recently, I have been looking at our departments marking procedures and how best to be effective markers (obviously reducing workload is key!). I designed this crib sheet as a way to provide quicker feedback to the whole classroom rather than writing comments in each book, so reducing marking time from 2-3 hours per class to less than an hour.

SWOT analysis is an extremely useful tool and framework used to evaluate an organisations competitive position and to develop appropriate processes for strategic planning.

SWOT Analysis: Strengths, Weaknesses, Opportunities ...

When I first started investigating marking and feedback, I never thought it would change my practice the way it has. During my PGCE and NQT years, I used to mark books, write a 'what went well' comment and an 'even better if' comment, then expect my students to read it, set themselves a target and act on that target at a later point.
