Methods. The process of waste paper recycling most often involves mixing used/old paper with water and chemicals to break it down. It is then chopped up and heated, which breaks it down further into strands of cellulose, a type of organic plant material; this resulting mixture is called pulp, or slurry.

Paper recycling - Wikipedia

WWF experts listed in this section are not available to respond to program-related questions from people outside of WWF. We encourage you to search other sections of our website for the answers you need.

Experts | Wildlife Biologists, Conservation Scientists | WWF

Recycling is an important way for individuals and businesses to reduce the waste they generate and reduce the negative impact of that waste. Because recycling is big business in Ohio, every time you recycle you support the many companies and employees doing this important work.
