What's the best, most effective way to take notes?

Starvation is a severe deficiency in caloric energy intake, below the level needed to maintain an organism's life. It is the most extreme form of malnutrition. In humans, prolonged starvation can cause permanent organ damage and eventually, death. The term inanition refers to the symptoms and effects of starvation. Starvation may also be used as a means of torture or execution.

Shell intends to cut the carbon intensity of the energy products we sell by around 20% by 2035 and by around half by 2050. That includes all the emissions from the life cycle of each of our energy products: from production to processing, to transportation and through to final use. This is what we call our Net Carbon Footprint ambition.
