Tennessee State University is engaging in cutting-edge research to address critical challenges in our society. Our research arm supports faculty and students by taking their ideas from conception to fruition in critical areas such as biotechnology, homeland security and agriculture, to name a few.

### **Requirements - Tennessee State University**

Evaluation of the safety of new chemicals and pharmaceuticals requires the combination of information from various sources (e.g. in vitro, in silico and in vivo) to provide an assessment of risk to human health and the environment. The authors have identified opportunities to maximize the predictivity of this information to humans while reducing animal use in four key areas; (i) accelerating ...

### **Pharmaceutical toxicology: Designing studies to reduce ...**

A MOA framework analysis presupposes that the WOE for an adverse effect in experimental animals has been evaluated and deemed sufficient as a basis for delineation of the critical effect (Boobis et al., 2006). After such a determination, potential MOAs are postulated to describe how the chemical exposure and adverse effect may be biologically linked, and the relative WOE and scientific ...
