There are many alleged reasons for the sudden halt to the Moon missions. While officially, a drastic cut in budget was offered to the public for the sudden pulling of further missions of perhaps the greatest achievement in American history, many believed there were other reasons. Some would claim the missions were still happening, only in secret.

Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.

In the age of computers and the Internet one of the most appealing theories of how mind is generated from the neurons of the brain is by the computation of large networks of connecting neurons. Olaf Sporns () coined the term "connectome;" it refers to the mapping of all neuronal connections. There are many large scientific projects underway in this field to try to find out if mapping the ...
