The Economic problem –sometimes called basic or central economic problem – asserts that an economy's finite resources are insufficient to satisfy all human wants and needs. Economics involves the study of how to allocate resources in conditions of scarcity. However, viewing economics as the study of how society allocates resources can lead to conflation of normative economic planning and ...

In economics, the freshwater school (or sometimes sweetwater school) comprises US-based macroeconomists who, in the early 1970s, challenged the prevailing consensus in macroeconomics research. A key element of their approach was the argument that macroeconomics had to be dynamic and based on how individuals and institutions interact in markets and on how they make decisions under uncertainty.
