In optics, a Gaussian beam is a beam of monochromatic electromagnetic radiation whose transverse magnetic and electric field amplitude profiles are given by the Gaussian function; this also implies a Gaussian intensity (irradiance) profile. This fundamental (or TEM 00) transverse gaussian mode describes the intended output of most (but not all) lasers, as such a beam can be focused into the ...

For soliton solutions, N must be an integer and it is said to be the order or the soliton. For $n = 1$ an exact closed form solution also exists; it has an even more complicated form, but the same periodicity occurs. In fact, all solitons with $n \geq 2$ have the period $T = 2\pi / \omega$. Their shape can easily be expressed only immediately after generation: $(\phi, \psi) = (\phi_0, \psi_0)$ on the right there is the plot of the second order ...

As depicted in Fig. 2, the process of AM can be divided into 8 different steps. First of all, a 3D model is designed by using a specialized computer-aided design (CAD) modeling software (Step 1) [1]. The file obtained is subsequently converted to an appropriate format for printing (Step 2) and then transferred to the AM machine (Step 3) where it is digitized and sliced into a number of ...
