Deception in animals is the transmission of misinformation by one animal to another, of the same or different species, in a way that propagates beliefs that are not true. Deception in animals does not automatically imply a conscious act, but can occur at different levels of cognitive ability.. Mimicry and camouflage enable animals to appear to be other than they are.

Deception in animals - Wikipedia

"All Eyes on the Pond" - Science Lesson Plan, Thematic ...

The cetacean skeleton is largely made up of cortical bone, which stabilizes the animal in the water. For this reason, the usual terrestrial compact bones, which are finely woven cancellous bone, are replaced with lighter and more elastic material. In many places, bone elements are replaced by cartilage and even fat, thereby improving their hydrostatic qualities.

Cetacea - Wikipedia

Two woodsaws, plus a hacksaw thought to have been used for cutting metal or bone, were among the items in the Mästermyr find. The hacksaw is shown here because this same shape is used in some types of wood saw today, and it gives an idea of the range of saw types available.
