Transform your chemistry students Chem101's active learning platform enables instructors to engage students in the classroom, assign homework, and provide on-the-go reinforcement

Chem101: Transform Your Chemistry Lecture with Active Learning

Learn about the fundamental concepts of chemistry including structure and states of matter, intermolecular forces, and reactions. You'll do hands-on lab investigations and use chemical calculations to solve problems. Note: Save your lab notebooks and reports; colleges may ask to see them before granting you credit.

The Virtual Lab is an online simulation of a chemistry lab. It is designed to help students link chemical computations with authentic laboratory chemistry. The lab allows students to select from hundreds of standard reagents (aqueous) and manipulate them in a manner resembling a real lab. More information and offline downloads. Things are a bit different when you need to find the volume, pressure, or temperature of a gas not at STP. You will need to solve PV = nRT for the dimension you need to find and attach it to the end of the sequence using the roadmap to find 'n' for the gas.Let's take another problem based on the same chemical equation to explore how to set up finding a gas not at STP.
