300+ TOP ELECTRICAL ENGINEERING Interview Questions & Answers

Guarding. Guarding involves locating or enclosing electric equipment to make sure people do not accidentally contact its live parts. Effective guarding requires equipment with exposed parts operating at 50 volts or more to be placed where it is accessible only to authorized people qualified to work with it.

OSHAcademy Course 115 Electrical Safety for Employees: Basic

A relay is an electrically operated switch. Many relays use an electromagnet to mechanically operate a switch, but other operating principles are also used, such as solid-state relays. Relays are used where it is necessary to control a circuit by a separate low-power signal, or where several circuits must be controlled by one signal.

Relay - Wikipedia

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element. 1. Prepare to undertake a capstone assessment
